

MANITOWOC

BEAUTIFUL BY NATURE
DISTINCTIVE BY DESIGN

Fine Cabinetry & Millwork

your vision is our passion

Whether it's a single room remodel or a complete interior design, our approach never varies: We listen to you and work with you on an individual basis to create a work of livable art, unique in its beauty and purpose—an interior space that spans the trends of the day to become a true reflection of who you are.

Midland Cabinet Company takes each and every project to heart. It's the way we have worked for more than four decades: uncompromising, in our craftsmanship, our professionalism and in our dedication to you, our client.

We're with you from start to finish, from design development to the last beautiful detail, a partner in making your dream rooms a reality.

Dream rooms made to order, that's the Midland way, and to ensure that those dreams are met, we work collaboratively with our clients, on every detail.

Our coffered ceiling and fireplace surround, bookcases and cabinets give this den elegance—the window seat adds functionality: it hides the television, which rises from the box when summoned remotely.

designed for your lifestyle

Modern families appreciate what Midland understands intuitively—how to create a room that pleases the eye and senses, but also one that addresses the needs of a busy, active lifestyle: We call the end result “functional beauty.”

Our kitchens are one example. Always impeccably presented, at the heart of these most nurturing of spaces is Midland’s attention to every element, including the room’s design character. Incorporating recessed lighting into a window arch above the sink, for instance, offers a practical solution, yet respects the integrity of the room’s architecture.

A Midland specialty: developing and engineering media-room systems that tuck televisions into wall panels, lifts them into ceiling recesses, even lowers them into seemingly innocent window seats—all with the touch of the remote button.

Your home speaks volumes—about your passions, lifestyle and esthetics. By choosing Midland, you can rest easy: the translation will be a mirror image, room by room.

each step—handcrafted

The best requires the best, which is why Midland uses only premium woods and the finest architectural veneers. Why we painstakingly match wood grains, why we choose quality finishes and hardware. Why our custom cabinet doors, our moldings—all of our work—is done onsite, in our own facility. We're focused on perfection.

We also care as much about healthy forests as we do about our commitment to excellence in workmanship, offering clients the opportunity to choose wood certified by the Forest Stewardship Council.

We do it all, millwork to molding, manufacturing to installation, and our staff of craftsmen, designers and building professionals is with you each step of the way.

stunning results

From kitchens and wine cellars to baths, libraries and butler pantries. From custom cabinets, molding and paneling to wine racks, islands and lighting systems: We take everything we do, everything we create to the next and highest level.
